

FUTURE FOUNDER.

OkCredit Future Founders Internship — Build for Bharat

Find a real merchant. Build an AI-powered solution they actually use. Eight weeks. Fully remote.

100% Remote

₹1.5L Prize Pool

Pan-India

Solo or Teams of 3

8 Weeks

Not a case study. Not a hackathon.

Build something a merchant actually uses.

OkCredit is inviting students to do something real: find a shopkeeper, distributor, or small-business owner in your personal network, discover a genuine problem in their operations, and ship an AI-powered app that actually gets used — fully remotely, in 8 weeks.

01

FIND A REAL MERCHANT

Someone you personally know running a real revenue-generating business.

02

INNOVATE GENUINELY

Build something original. AI must be the core capability — not decoration.

03

PROVE ADOPTION

7 consecutive days of daily usage, with timestamped evidence. No demo videos.

The 8-week journey

One submission per week, every Friday 23:59 IST. Fully remote.

Week	Deliverable	Outcome	Phase	Due
W0	Sign-up & T&Cs	Confirm intent + lock team	Foundation	May 15
W1	Business Explorations	1–3 merchant profiles + observations	Discover	May 22
W2	Problem Shortlist	Top friction points from real talks	Discover	May 29
W3	Lock-In	One merchant. One problem. Hypothesis	Lock-In	Jun 5
W4	POC Demo	2-min screen recording of working POC	Build	Jun 12
W5	V1 in Merchant's Hands	Deployed app with active merchant	Build	Jun 19
W6	Feedback + Iteration	What broke, what worked, changelog	Build	Jun 26
W7	Usage Streak Evidence	5+ days/week active for 2 weeks	Adopt	Jul 3
W8	Final Submission	Live app + usage data + testimonial	Adopt	Jul 10

Miss two consecutive deliverables → exit prize pool. Certificate track stays open.

How we judge

Innovation is weighted 3× higher than typical hackathons. We reward courage to think differently.

30%

Innovation

Original problem. AI-native. Non-copycat.

25%

Merchant Value

Real pain solved. Merchant would pay for it.

20%

Usage & Stickiness

7-day verified daily usage with timestamps.

15%

Product Craft

UX quality, reliability, usable by a non-developer.

10%

Storytelling

Demo clarity, testimonial, narrative structure.

Judges ask: could this exist without a language model? If yes, the score is low. No clones. No generic chatbots.

What's at stake
